24hr emergency contact: 1-800-561-8273

NET CONTENTS:

16 WETTABLE SOLUBLE PACKETS (4 x 4 WSP)

Individual Packet Weight: 165.85 g

Carton Net Weight: 2.65 kg

Store in a cool dry area above 4°C (40°F).

Do not allow packets to freeze.

Do not expose packets to direct sunlight or excessive heat.

Do not handle the packets with wet hands.

FIRST AID

In case of eye contact, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

In case of ingestion, do not induce vomiting unless told to do so by a poison control centre or doctor.

Do not give anything by mouth to an unconscious person.

Take container, label or product with you when seeking medical attention.

Refer to Material Safety Data Sheet for additional information regarding product safety and precautions.

APPLICATIONS

Aquamark WSP conveniently transforms pale, dirty or off-coloured water to a sparkling blue.

Aquamark WSP may be used to colour ornamental lakes, ponds, fountains and other contained bodies of water.

This product should not be applied to streams, rivers, outflows, or water not completely controlled by the user.

Aquamark WSP may be applied to areas used for irrigation, but not for direct human consumption.

Swimming and other recreation sports are approved during and following use of the product.

Fish, waterfowl, and animals are not harmed by normal use of this product

- Protect the packets from moisture prior to usage.
- Minimize handling to avoid breakage, and reseal the outer bags to protect unused packets.
- When handling packets, gloves are not required, but recommended to prevent blue dye from colouring skin.

DIRECTIONS

Determine the volume of water to be treated, and then consult the suggested use rate chart to determine the number of water soluble packets to use. If a darker or lighter colour of water is desired, vary the rate accordingly. Simply toss or drop the correct number of packets into the water. Evenly spaced packets aid in quicker, more even coverage. Solubility typically occurs in 5 to 10 minutes, depending on water temperature.

SUGGESTED USE RATES

AREA TO BE TREATED	RATE TO USE
1,234 m ³ (1 acre foot*)	1 Water Soluble Packet
4,934 m ³ (4 acre feet*)	4 Water Soluble Packet

* 1 acre foot = 1acre, 1 foot deep or 325,851 gallons
