

## Post-emergence Grass & Broadleaf Weed Control

# BENZ

## HERBICIDE

### Quality Herbicide at a Sharp Price Point

BENZ combines the two active ingredients: imazamox and bentazon. Imazamox is a selective herbicide that when applied as an early post-emergence treatment may be absorbed through both the roots and foliage. Susceptible weeds stop growing and eventually die. Bentazon provides selective post-emergence control of many broadleaf weeds via uptake through the leaves. Bentazon does not control grasses.

**ACTIVE INGREDIENT:** Imazamox 20 g/L, Bentazon (present as sodium salt) 429 g/L

*Only generic offering a formulated product*

### Registered Crops:

- Field peas
- Succulent peas
- Dry faba beans
- Soybeans
- Dry beans
- Established red and alsike clover for seed production
- Seedling and established alfalfa for seed, forage and hay

### Weeds Controlled:

- Barnyard grass
- Cleavers\* (including Group 2 resistant biotypes)
- Cow cockle
- Green foxtail
- Green smartweed
- Hemp nettle\*
- Japanese brome grass\*
- Kochia\* (including Group 2 resistant biotypes)
- Lamb's-quarters
- Lentils (including Clearfield® Lentils1)
- Persian darnel
- Prostate Pigweed\*
- Redroot pigweed
- Round-leaved mallow\*
- Russian thistle
- Shepherd's purse
- Sowthistle\*, annual
- Sowthistle\*\*, perennial
- Stinkweed
- Storks bill

- Volunteer barley
- Volunteer canary seed
- Volunteer canola (Clearfield and non-Clearfield tolerant canola)
- Volunteer durum wheat
- Volunteer spring wheat (non-Clearfield tolerant wheat)
- Volunteer tame oats
- Wild buckwheat\*
- Wild mustard (including Group 2 resistant)
- Wild oats
- Yellow foxtail

### Features:

- Formulated product for ease of use
- Two modes of action for effective weed control
- Control of some group 2 resistant weeds
- Control of broadleaf and grassy weeds

\* = suppression only

\*\* = top growth suppression only
