

Nurseries

Why Use Casoron This Fall?

Casoron® G4

Labour-free Weed Control

- Granular formulation may be applied direct to soil surface
- Cost is less than manual weeding
- Gives long lasting effective control
- Will not harm woody annuals when label directions followed
- Highly effective against a wide spectrum of annual and perennial weeds
- Maximize growth of young trees and shrubs with reduced weed competition
- Less rodent damage as weedy shelters are reduced
- Easy to measure and may be applied using versatile application methods such as manual applicators, power applicators or tractor mounted applicators
- No water transport required to get the product into the weed germination zone
- Please contact your local UAP retailer for more information

RATES OF CASORON G4 FOR NURSERIES

Label recommendation for nursery crops listed on the label is 110-175 kg/ha broadcast.

TREATING SMALLER AREAS OR CALIBRATING:

AREA TREATED					
Casoron G4/ha	1m X 1m	1.5m X 1.5m	2m X 2m	2.5m X 2.5m	3m X 3m
110 kg	11 gm	25 gm	45 gm	70 gm	100 gm
175 kg	17 gm	40 gm	70 gm	110 gm	160 gm

BAND TREATING: To calculate amount needed to treat a band the following formula is used:

Treated area = Total area X band width/row spacing

Treated area X rate per ha = amount needed to treat bands in one hectare

Example:

If you want a band 60 cm (2 ft) over the row and rows are 1.22 m (4 ft) apart over 1 hectare:

Treated area = 1 ha X 0.6 m/1.22 m = 0.49 ha

At a rate of 110 kg/ha: 0.49 ha X 110 kg/ha = 54 kg needed to treat all the rows in one hectare

At higher rate of 175 kg/ha: 0.49 ha X 175 kg/ha = 86 kg needed to treat all the rows in 1 hectare

1 bag = 15 kg

At 110 kg/ha, 1 bag will treat 1360 m², at 175 kg/ha 1 bag will treat 857 m²

METERS OF ROW TREATED PER BAG BASED ON BAND WIDTH

Band width	At 110kg/ha, 1 bag treats:	At 175kg/ha, 1 bag treats:
15 cm (6")	9066 m	5713 m
30 cm (1 ft)	4533 m	2856 m
60 cm (2 ft)	2266 m	1428 m
90 cm (3 ft)	1511 m	952 m
120 cm (4 ft)	1133 m	714 m
150 cm (5 ft)	907 m	571 m
