

**For Better Weed Control
You Can Trust.**

Choose Devrinol®

For more than 20 years, growers have trusted Devrinol® herbicide to control some of the most troublesome grasses and broadleaf weeds in berry crops.

Devrinol consistently provides season long, economical control of more than 40 broadleaf weeds and grasses. It is also a reliable tank mix partner with other herbicides to increase residual weed control, expand the weed spectrum or address specific weed problems.

Available in a 10-G and a new 50% DF-XT formulation, Devrinol can be applied pre-plant incorporated or post-plant surface applied. Protect your crop investment. Ask your dealer or crop consultant about including Devrinol in your weed management program today.
