

Double Nickel LC[®]

BIOFUNGICIDE

A new generation fungicide and bactericide.

Double Nickel

Easy to Use, Flexible to the Max

Double Nickel deploys multiple modes of action and is available in both dry or liquid formulations. Derived from a natural soil bacterium so it doesn't harm natural-occurring bacteria in the soil and is safe with bees/beneficial insects.

Its unique formulation allows you to use lower rates and can be used in either conventional or organic production.

Fighting disease from Top to Bottom:

Registered as soil applied for *Rhizoctonia* & foliar for White Mold plus Early Blight in potatoes.

Always read and follow label directions.

Double Nickel 55 WDG & Double Nickel LC are registered trademarks of Certis USA, L.L.C.
