3. HAZARDS IDENTIFICATIONS**PHYSICAL PROPERTIES:**

Appearance: Amber brown liquid

Odor: Aromatic (Solvent)

EMERGENCY OVERVIEW: WARNING Skin and eye irritant

LIKELY ROUTES OF EXPOSURE: Ingestion, skin absorption, inhalation, and eye contact.

SYMPTOMS OF ACUTE EXPOSURE:

EYE: May cause moderate eye irritation. May cause slight corneal injury. Vapor may lead to eye irritation causing mild discomfort and redness.

SKIN: Brief contact basically non-irritating to skin. Prolonged or repeated exposure may cause skin irritation or burn. Repeated contact can lead to drying or flaking of skin. Prolonged exposure is unlikely to result in absorption of harmful amounts. The LD₅₀ for skin absorption is > 4,000 mg/kg. No allergic reactions were noted when tested in guinea pigs.

INGESTION: Low toxicity if swallowed. The oral LD₅₀ for rats is > 2,000 mg/kg. Swallowing small amounts incidental to normal handling operations are not likely to cause injury; however, swallowing larger amounts

may cause injury. Aspiration into the lungs may occur during ingestions or vomiting and can cause lung damage or even death due to chemical pneumonia.

INHALATION: No adverse effects anticipated from a single exposure to vapor. The LC₅₀ for rats is > 5.05 mg/L (4 hours). Prolonged exposure to solvent may cause respiratory irritation and central nervous system depression. May cause nausea or vomiting.

PHYSICAL OR CHEMICAL HAZARDS COMBUSTIBLE. Do not use or store near heat or open flame.

HAZARDOUS DECOMPOSITION PRODUCTS: Chloride compounds, fluorine compounds , carbon oxides (CO, CO₂) , nitrogen oxides (NO, NO₂...)

4. FIRST AID MEASURES

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take the container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: This product contains petroleum distillates. Treatment should be based on judgment of the physician in response to reactions of the patient. Vomiting may cause aspiration pneumonia.

5. FIRE FIGHTING MEASURES

FLASHPOINT: > 61°C (141.8°F)

FLAMMABLE LIMITS (% in air): Not applicable

AUTOIGNITION TEMPERATURE: Not applicable

EXTINGUISHING MEDIA: For small fire: dry chemical powder, water spray carbon dioxide. For large fire: foam, water fog, water spray.

SPECIAL EXPOSURE HAZARDS: Flashback may occur along vapor trail.

FIRE AND EXPLOSION HAZARDS: Dangerous gases are evolved in the event of a fire.

FIRE-FIGHTING PROCEDURES: Self-contained breathing apparatus and total protection required in enclosed areas.

HAZARDOUS DECOMPOSITION PRODUCTS: Chloride compounds, fluorine compounds, carbon oxides (CO, CO₂), nitrogen oxides (NO, NO₂...).

6. ACCIDENTAL RELEASE MEASURES
