

# Get the Harvest Started with the Addition of LI 700<sup>®</sup> to Diquat Formulated Desiccants or Pre-harvest Glyphosates

For years LI 700 non-ionic penetrating surfactant with unique Leci-Tech technology has been delivering better spray performance with many pesticide formulations. Registered with Diquat formulated desiccants (Armory, Dessicash, or Reglone) or used with any glyphosate formulation (IPA, K Plus, DMA or MA), LI 700 is the perfect fit for your pre-harvest management strategy.

 **Pre-Harvest Glyphosate:** Add LI 700 for pre-harvest perennial weed control and to equalize crop harvest management

 **Diquat Desiccants:** Add LI 700 to boost the rapid plant tissue dry down to facilitate harvest

**Expect More!** The addition of LI 700 with Leci-Tech brings Improved:

 **Drift Management** – reduces percent of spray droplets prone to drift without increasing the number of oversized droplets

 **Adhesion** – prevents spray droplets from bouncing off the leaf surface improving coverage - better coverage = better efficacy

 **Droplet Spread** – provides better droplet spread on leaf to increase pesticide contact

 **Penetration** – enhances penetration by temporarily relaxing the waxy cuticle and opening it up for faster uptake

**Get all the benefits of LI 700 with Leci-Tech working for you and EXPECT MORE from your pre-harvest management application of Diquat Desiccants or Glyphosate!**

## Directions for Use:

 Follow all directions and precautions on the desiccant label and the glyphosate product label registered for pre-harvest application

 Add LI 700 to the spray tank last at a rate of 0.25% v/v (2.5 L per 1000 L of spray solution)
