

NEXT 70 WDG

HERBICIDE

Quality Herbicide at a Sharp Price Point

NEXT 70 WDG is a water dispersible granule herbicide for use in the Prairie provinces and interior of British Columbia only. It is a selective herbicide that can be applied as an early post-emergence treatment. When it is applied early post-emergence, absorption may occur through both the roots and foliage. Susceptible weeds stop growing and eventually die.

ACTIVE INGREDIENT: Imazamox 70% a.e.

*Take weed control
to the NEXT level!*

Cropland uses:

NEXT 70 WDG is formulated for use in Imazamox tolerant crops such as: Canola, Canola Quality Brassica juncea, Sunflowers, Lentils
