

## Get the Broadleaf Weed Control you need with crop rotation flexibility you require

**NIMBLE** Herbicide is your trusted choice for selective post emergence control and suppression of broadleaf weeds in wheat, (spring, winter or durum) spring barley, oats and in certain grasses for forage and seed production.

The power of thifensulfuron and tribenuron in a readily water dispersible granular formulation effectively takes out 21 different broadleaf weeds including some of the more common weeds such as narrow-leaved hawk's beard, wild buckwheat, volunteer canola (excluding Clearfield® varieties), red root pigweed, lamb's quarters and Russian Thistle.

The active ingredients break down rapidly in the soil and as a result, **NIMBLE** has no re-cropping limitations for the following season.

Because of **NIMBLE'S** tank-mix flexibility with other broadleaf herbicides including MCPA Ester, 2,4-D, Attain™, Curtail™ M and Clopyralid, more than 40 broadleaf weeds can be managed in crop using multiple modes of action. The use of different modes of action on weeds is a proven method in the combat to slow the progress of herbicide resistance.

### Labeled Crops and Applications

- WHEAT (SPRING, WINTER OR DURUM)
- SPRING BARLEY
- OATS
- SEEDLING AND ESTABLISHED GRASS SPECIES FOR FORAGE AND SEED PRODUCTION

### Key Labeled Weeds

#### CONTROL

- |   |   |
|---|---|
| • Ball mustard                                  | • Narrow-Leaved Hawk's Beard                        |
| • Common groundsel                              | • Redroot pigweed                                   |
| • Corn spurry                                   | • Russian Thistle                                   |
| • Cow cockle                                    | • Shepherd's Purse                                  |
| • Green smartweed                               | • Stinkweed   |
| • Flixweed                                      | • Tartary buckwheat                                 |
| • Kochia (excluding Group 2 resistant biotypes) | • Volunteer Canola (excluding Clearfield® biotypes) |
| • Hempnettle                                    | • Volunteer Sunflower                               |
| • Lady's Thumb                                  | • Wild mustard                                      |
| • Lamb's quarters                               | • Wild buckwheat                                    |

#### SUPPRESSION

- |                       |                |
|-----------------------|----------------|
| • Canada Thistle      | • Sow-thistle  |
| • Cleavers            | • Stork's-bill |
| • Round-leaf mallow   | • Toadflax     |
| • Scentless chamomile |                |
