Vitaflo 280 controls many key diseases in many different crops. In fact Vitaflo controls more diseases on more crops than any other seed treatment on the market today. It is the only seed treatment manufactured, formulated and packaged in Canada.

Vitaflo 280 has strong field support with experienced technical representatives to service retailers and growers alike. This economical seed treatment has proven over the years that it provides a very profitable return on investment.

¹Label Claims as of December 15, 2008.

Vitaflow 280 is a systemic, low hazard, water-based product that includes a colorant, a de-duster and the actives carbathiin and thiram. Vitaflow 280 has antifreeze for low

temperature seed treating and low dust levels for treated seed. This is an excellent product group for fungicide resistant management.
