

LoKomotive™ (2-0-25)

Propel Your Crop Forward

LoKomotive is *potassium acetate*, a new type of liquid potassium (K) that has significant advantages and benefits as a post-emergent applied potassium source. Unlike other liquid potassium sources, LoKomotive has been specifically designed to provide maximum potassium uptake and excellent crop safety.

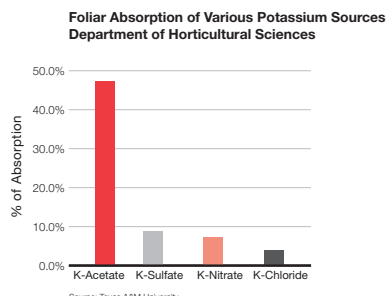

Features:

- Derived from 100% *potassium acetate*
- Allows for in-season adjustment of plant potassium levels
- High potassium analysis and chlorine free
- Blends with a wide range of fertilizers and pesticides*

Benefits:

- Low use rates
- Optimal potassium levels increase plant water and nitrogen use efficiency
- Excellent crop safety
- Promotes growth, yield and standability

LoKomotive can be applied to most field and specialty crops to correct potassium deficiency symptoms,

enhance growth and quality and help crops recover from stressful conditions. Multiple applications may be required.

Application Information:

- **Broadcast Applications:**
 - All crops apply in a minimum of 8 gallons of water per acre.
 - *Canola*: Apply 2 to 4L/acre at bud to early bloom stage
 - *Wheat, barley and oats*: Apply 2 to 4L/acre at flag to boot stage
 - *Peas, lentils, and dry beans*: Apply 2 to 4L/acre at late bud to early bloom stage
 - *Soybeans*: 2 to 6L/acre at early pod development

Mixing Instructions:

- LoKomotive mixes easily with water, as follows:
 1. Fill tank half-full with water and start agitation.
 2. Add all crop protection products* (following manufacturers' mixing instructions) and then **LoKomotive**.
 3. Fill tank to desired volume and continue to agitate thoroughly prior to spray application.
