

A reliable post-emergent herbicide in the fight against weeds in soybeans.

• **Ultra Blazer[®] is the emerging post-emergent herbicide of choice for control of the most troublesome ALS and glyphosate-resistant broadleaf weeds including:**

- Canada thistle*
- Cocklebur
- Field bindweed*
- Hedge bindweed*
- Jimsonweed
- Lady's thumb (smartweed)
- Lamb's quarters
- Milkweed* (common)
- Mustard (wild)
- Nightshade (eastern black)
- Pigweed (redroot)
- Ragweed (common)

*suppression

- **A great addition to your weed resistance management program**
- **Can be used in consecutive years at any labeled rate**
- **Can be applied alone, or in a tank mix with other labeled herbicides**

Active Ingredient

Acifluorfen

Trusted Performance

Ultra Blazer herbicide is a water-based post-emergent herbicide with excellent control of the most troublesome and problematic broadleaf weeds. It is a valued foundation of any soybean herbicide rotation program, and is an excellent alternative in glyphosate-resistant weed management programs.

Resistance Management

Ultra Blazer is a WSSA Group 14 herbicide. It offers a broad spectrum of activity and can be easily tank mixed with glyphosate and many other herbicide treatments.

Crop

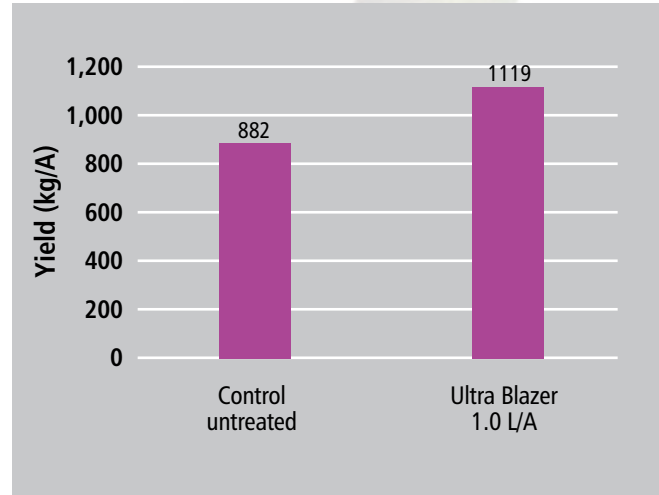

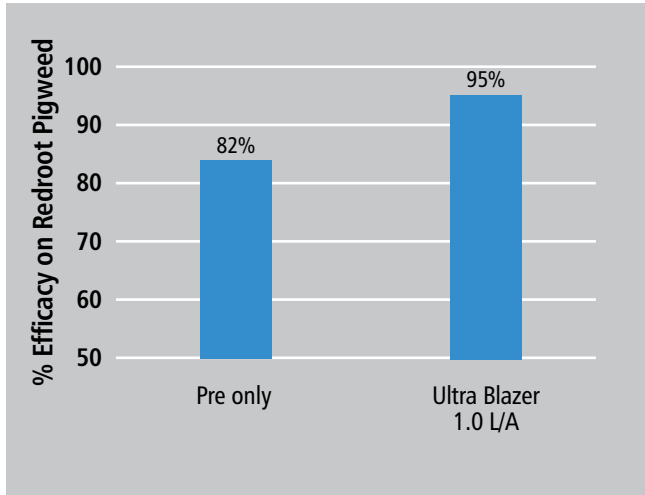

Soybeans

Use Rates

1.25 - 2.5 L/ha (0.50 - 1.0 L/acre)

Recommended rate is dependent on leaf stage and weed species targeted for control.
