

Water Conditioner

Choice® Weather Master is a water conditioning agent for use with agricultural chemicals. Designed for hard water conditions, this liquid formulation locks up hard water cations allowing maximum herbicide performance. Compatible with all formulations of glyphosate, including the newer K-salts.

PRODUCT FEATURES:

- Water Conditioner
- Multiple Sequestering & Chelating agents
- Liquid Formulation

PRODUCT BENEFITS:

- Reduces effects of hard water on herbicide performance
- Bind multiple hard water cations, such as calcium, manganese, magnesium and potassium.
- Convenience of treating 1000L with 2 to 5L of liquid instead of 12 to 24 kg of dry product.

ACTION OF CHOICE WEATHER MASTER IN HARD WATER

Hard water with cations

Addition of certain active ingredients actually "lock-on" to the cations.

The addition of CHOICE Weather Master results in it "locking-on" to the hard water cations. This prevents hard water cations from interfering with the herbicide performance.

● Hard water cations ● Active ingredient ● CHOICE Weather Master

APPLICATION INFORMATION:

- Apply 2 to 5L of **Choice Weather Master** per 1000L of water (based on water hardness)*
- Fill spray tank ½ full of water and begin agitation
- Add desired rate of **Choice Weather Master** to water before adding pesticides
- Higher mineral content in water requires higher rates of **Choice Weather Master**

*Always read and follow label directions.
