

# Double Nickel LC<sup>®</sup>

BIOFUNGICIDE

## A New Generation Fungicide & Bactericide

### Market Ready

- Worker safety
- No MRL issues
- Resistance management
- OMR<sup>®</sup> Listed

### Ease of Use

- Harvest day of application
- Faster field reentry
- Tank mix flexibility
- Double Nickel WG or Double Nickel LC formulations

**CERTIS USA**  
The Biopesticide Company

# Double Nickel LC<sup>®</sup>

BIOFUNGICIDE

## Features

- Works as both a fungicide and bactericide
- Colonizes rhizosphere, preventing establishment of fungi
- Growth promotion/stimulation by improving nutrient uptake
- Competitive exclusion preventing infection by pathogens
- Triggers Induced Systemic Resistance (ISR) and Systemic Acquired Resistance (SAR)

## Benefits

- Effective against *rhizoctonia* and other soil borne diseases
- Foliar diseases include fire blight, trauma blight, Botrytis, powdery mildew, bacterial leaf spot
- Very low risk of developing resistance
- Apply yearly for soil borne diseases, as needed for foliar diseases
- Compatible with most fertilizers, insecticides, herbicides and fungicides
- Minimal label restrictions
- No MRL issues
- 4-hour REI
- 0 PHI
