

Selective Herbicide for postemergent Weed Control

FLORA

HERBICIDE

Quality Herbicide at a Sharp Price Point

FLORA Herbicide is a selective herbicide that can be applied as an early post-emergent broad-leaved treatment in Wheat, including Durum, Spring Barley and Oats. It is effective against some of the main broadleaved including Cleaver, Wild Buckwheat and Chickweed. When FLORA Herbicide is applied early post-emergence, absorption may occur through both the roots and foliage. Susceptible weeds stop growing and eventually die.

ACTIVE INGREDIENT: : Florasulam 50g/L

Packaging:

- 2 x 6.4L

Application Rates:

- 100ml/ha
- Case covers 128 ha
