

UPI Technical Product Sheet

Hurricane™ Post-Emergent Group 6 & Group 14 Herbicide

Active Ingredient - Acifluorfen Group 14 & Bentazon Group 6

Pack Size – 2 x 10 L case

BENEFITS:

- Management tool for control of Roundup resistant pigweed, ragweed and water hemp in both Roundup Ready®, LibertyLink® and IP Beans.
- Dual mode-of-action to control herbicide resistant broadleaf weeds, part of a sound herbicide management plan.
- Conveniently packaged and affordably priced.
- Multiple registered tank mix options (graminicides) with a variety of grassy weed control partners.

Rate – A case treats 28 acres (0.71 L / acre)

Water Volume – contact herbicide, good spray coverage is critical in achieving good weed control results, minimum of 11 - 21 Gal / acre. To achieve consistent weed control, the use of ammonium sulfate or crop oil concentrate is recommended.

Application Timing – 1 - 2 trifoliolate stage of soybeans, target smaller weed sizes for best results, weeds at maximum label size require maximum rates.

Pre Harvest Interval – non specified

Rainfast – 4 hours.

UPI Technical Product Sheet

Post Application Notes –

Soybeans may show speckling, yellowing or depending on conditions and growth at application. Soybeans usually outgrow this crop response which is similar to other PPO's in the market place and continue to grow at a normal rate with no adverse effects on yield.

TANKMIXES:

Assure® II
Basagran®*
Broadloom*
Classic®
FirstRate®
Pinnacle®
Poast®
Pursuit®
Odyssey®
Glyphosate (various brands)
