

Postemergence Control of Grasses & Broadleaf Weeds

MAGNA

HERBICIDE

Quality Herbicide at a Sharp Price Point

MAGNA Herbicide for a one-pass broad-spectrum weed management program in Glyphosate Tolerant corn. MAGNA Herbicide has both contact and residual activity. Following a post-emergent application of MAGNA Herbicide, emerged weeds take up the herbicide through treated foliage and cease growth soon after application. MAGNA Herbicide is also absorbed through the soil and/or by the foliage of emerging weeds.

ACTIVE INGREDIENT: Glyphosate (present as the potassium salt) 250 g/L
S-metolachlor (and R-enantiomer) 250 g/L, Mesotrione 25 g/L
