

# NATURE'S BASICS™ 2X

## NATURAL SOLUTIONS *for* CROP PERFORMANCE

Formulated to promote robust plant development and intended to increase production potential, our global performance range includes biostimulants, plant activators, and fertilizers.

Specially formulated for forage and oilseed crops, **NATURE'S BASICS 2X** is a blend of micronutrients and fermentation metabolites that are applied during flowering and fruit development to supply the plant with the nutrition required for better growth, fruit set and seed development.

### GUARANTEED ANALYSIS

Boron (B) .....	0.5%
Iron (Fe) .....	0.5%
Manganese (Mn) .....	0.2%
Zinc (Zn) .....	3.0%

*Derived from Boric acid, Ferrous sulphate, Manganese sulphate and Zinc sulphate*

*Alltech is an industry leader in animal and plant nutrigenomic research, the study of how nutrition affects gene expression. Discovering how plants respond to nutrients and novel bioactive compounds at a genetic level allows Alltech to design and formulate solutions that optimize plant health and performance.*

## NATURE'S BASICS™ 2X *directions for use*

Apply NATURE'S BASICS 2X as a foliar application and dilute in a minimum of 100L of water per hectare. This product should be used on the basis of a soil and/or tissue analysis. When tank mixed with other chemicals, compatibility testing should be conducted prior to application.

Crop	Rate	Time of Application
Alfalfa	0.75 L/ha (0.3 L/acre)	Apply 10 days after cutting, when growth has appeared.
Canola	0.75 L/ha (0.3 L/acre)	At early flowering.
Soybean	0.75 L/ha (0.3 L/acre)	At early bloom (R1). Repeat at early pod development (R3).
