Insecticide

Poleci 2.5 EC East

GUARANTEE: Deltamethrin 25 g/L

A powerful synthetic pyrethroid that provides fast and effective control of a range of insects

Poleci 2.5 EC East Insecticide controls insects through contact and/or ingestion. For maximum efficacy, it is necessary to keep crop and pest under observation to be able to spray at the correct timing and ensure that insects are contacted during spraying, especially if they are found on the underside of leaves or if the foliage is very dense.

Registered Crops:

Apples, Asparagus, Blueberries, Broccoli, Brussel Sprouts, Cabbage, Cauliflower, Kale, Onions, Oriental mustard, Peaches, Pears, Peppers, Potatoes, Strawberries, Sunflowers, Tobacco, Tomatoes, Wheat, Barley, Oats, Flax, Canola, Mustard, Sunflowers and Corn.
