

Fast & Effective Control of a Range of Insects

POLECI 2.5 EC WEST

INSECTICIDE

Quality Insecticide at a Sharp Price Point

POLECI 2.5 EC Western Insecticide is a powerful synthetic pyrethroid which controls insects through contact and/or ingestion. For maximum efficacy, it is necessary to keep crop and pest under observation to be able to spray at the right moment and ensure that insects are contacted during spraying, especially if they are found on the underside of leaves or if the foliage is very dense.

GUARANTEE: Deltamethrin 25 g/L

Registered Crops:

Wheat, Barley and Oats, Canola, Grasses, Mustard, Lentils, forages, shelterbelts, Potato, Corn
