

Broad Spectrum Disease Control

PREACH

FUNGICIDE

Quality Fungicide at a Sharp Price Point

PREACH Fungicide, an emulsifiable concentrate (EC) has a different mode of action and is effective against pathogens resistant to other fungicides. PREACH Fungicide has a protective effect because it inhibits spore germination and a curative-eradicator effect due to the inhibition of mycelial growth and sporulation of the fungus on the leaf surface. It can be applied in either pre- or post-infection situations, optimum disease control is achieved when PREACH Fungicide is applied preventatively in a regularly scheduled protective spray program and is used in a rotation program with other fungicides.

ACTIVE INGREDIENT: Pyraclostrobin 250 g/L

Registered Crops:

- Wheat
- Barley
- Rye
- Oats
- Lentils
- Dry field peas
- Dry beans
- Faba beans
- Soybeans
- Edible podded legume vegetables
- Succulent shelled beans & peas
- Chickpeas
- Potatoes
- Sugar beets
- Flax
- Sunflower
- Canola
- Mustard
- Bluegrasses
- Fescues
- Ryegrasses
- Timothy

Packaging: 2 x 6.5L jug

Rate: 0.120 - 0.240 L/acre
1 case treats 110-55 acres

Diseases Controlled:

- Stem & Leaf rust
- Tan spot
- Septoria leaf spot
- Spot blotch
- Stripe rust
- Powdery Mildew
- Net blotch
- Scald
- Crown rust
- Anthracnose blight
- Mycosphaerella blight
- Asian soybean rust
- Frog eye leaf spot
- Angular leaf spot
- Ascochyta blight
- Common rust
- Grey leaf spot
- Cercospora leaf spot
- Black spot
- Blackleg
- Brown stripe
- Purple eye spot
