

RODENT BAIT (MEAL)

POWERFUL and FAST ACTING control of rodent pests

Active Ingredient: Zinc Phosphide 2%

Formulation: Granules (waxed corn)

How it Works: When target pests eat the meal, phosphine gas is created in the stomach and is toxic to the pest

Package Size: 20 kg bag

PCP# 16122

- Fast Acting - begins working in 3 hours
- Meal form that is appealing to small rodent pests
- Economical low dose rate
- Easy to use - direct baiting to underground burrows
- Single dose feeding for control

RODENT PESTS CONTROLLED:

- Pocket Gopher
- Ground Squirrel (Richardson's, Thirteen Lined and Franklin's)
- Voles
- Deer and House Mice
- Rats (including Norway Rat)

DIRECTIONS FOR USE:

- Pocket Gophers and Ground Squirrels - place one level teaspoon into each burrow. After 10 days close burrows. If any burrows re-open, re-bait. DO NOT apply to unoccupied burrows.
- Voles and Mice in orchards and nurseries. Broadcast rate of 4.5—9 kg/hectare. Best time to apply is in the fall. Do not apply to bare ground or if rain is expected.
- House Mice: Place bait in level teaspoon amounts in bait stations 2.5—3.7 m apart.
- Rats: Use 15 grams per bait station. Place bait stations around buildings or in storage areas
- For mice and rat control, always use tamper proof bait stations. If used outdoors bait stations must also be resistant to weakening by non-catastrophic weather (rain, snow, direct sun etc.)
- Store unused product in original container in a cool dry place

Rodent Bait (Meal) is a registered product of Neogen Corporation
