

Green With Envy

Foliar Applied

Green With Envy is an 16-8-3 plus micros including copper, iron, manganese, and zinc. **Green With Envy** is an excellent “catch all” nutritional product.

PRODUCT FEATURES:

- Can be applied foliar to soybeans, corn and alfalfa
- When sprayed early in soybeans, **Green With Envy** will help retain blooms, discourage aborting blooms and offer a greater opportunity for the plant to set more pods.

APPLICATION INFORMATION:

All crops apply in a minimum of 200L of water per ha (8 gallons of water per acre).

Alfalfa:

- Use **Green With Envy** at 4.6 - 9.2L/ha (2 to 4L per acre). Apply after each cutting at 2nd trifoliolate*.

Cereal grains (barley, oats, rye, wheat):

- Use **Green With Envy** at 2.3 - 4.6L/ha (1 to 2L per acre). Begin after development and continue at 2 week intervals.*

Corn (field & sweet):

Use **Green With Envy** at 2.3 - 4.6L/ha (1 to 2L per acre). Begin after the 2nd leaf unfolds for a total of 6 applications.*

Soybeans:

Maintaining blossoms and filling pods are moisture and nutrient dependant functions. **Green With Envy** is a great supplement to maintain pods and boost yield. Use **Green With Envy** at 4.6 - 7L/ha (2 to 3L per acre). Apply anytime prior to bloom for faster recovery after stress.*

*Always read and follow label directions.
